BRIGHT COFFEE SHOP

INTRODUCTION

The objective of this presentation is to analyze historical sales performance for Bright Coffee Shop and identify key trends and provide data-driven recommendations to improve overall business performance and decision-making.

BRIGHT COFFEE SHOP

REVENUE BY MONTH

Insights:

Sales show a strong upward trend from January to June, with an increase of approximately 80 to 100 percent. The business reaches peak performance in May and June, indicating strong growth over time.

BRIGHT COFFEE SHOP

REVENUE BY TIME OF DAY

Insights:

The morning period contributes nearly half of the total revenue (45-50%), making it the most important time of day. Afternoon sales are moderate (30-35%), while evening sales are the lowest (15-20%).

BRIGHT COFFEE SHOP

REVENUE BY SPEND BUCKET

Insights:

Most customers fall into the low-spend category (85-90%), contributing the largest portion of the revenue, medium spend (8-10%); and high spend (2-5%). This scenario presents an opportunity to increase revenue by encouraging higher spending per transaction.

Spend Buckets Per Store

BRIGHT COFFEE SHOP

REVENUE BY CATEGORY

Insights:

The majority of revenue comes from coffee, contributing 60-70% of revenue, while other categories contribute 30-40%. This highlights the importance of focusing on high-performing products.

RECOMMENDATIONS

Insights:

To improve sales, the business should focus on maximizing morning sales by 5-10%, increasing afternoon activity through promotions by 10-15%, and upselling customers to increase average spend by 10-20%. Additionally, focusing on top-performing products will drive higher revenue.

Improve Peak Performance

- **Staffing & scheduling:** Align staff shifts with the busiest hours to ensure smooth service.
- **Inventory readiness: Stock** high-demand items before peak times to prevent shortages.

Increase Low-Period Sales

- **Happy hours or discounts:** Offer deals during slower periods to attract customers.
- **Bundles & combos:** Encourage purchases by creating appealing package deals.

Upsell Customers

- **Loyalty programs:** Reward customers for higher-value purchases.
- **Digital prompts:** Use online checkout or app notifications to suggest upsells.

Focus on Top Products

- **Promotions & discounts:** Run campaigns to drive repeat purchases of top products.
- **Customer feedback:** Use reviews and ratings to refine product focus.

RECOMMENDATIONS

Conclusion:

Strong Growth Trend

- The data shows a consistent increase in sales and customer engagement, indicating the business is on a solid upward trajectory. This sets a strong foundation for future expansion.

Clear Opportunities

- Analysis highlights specific areas for improvement—like boosting low-period sales, upselling customers, and focusing on top-performing products—allowing targeted strategies that maximize impact.

Data-Driven Improvements Possible

- With actionable insights from sales patterns, customer behavior, and product performance, the business can implement strategies confidently, measure results, and continuously optimize for better outcomes.
